DETAILED ACTION

1. This communication is in response to Applicant's amendment filed on December 14, 2004. Claims 1-33 are pending in this application.

Allowable Subject Matter

2. The following is a statement of reasons for the indication of allowable subject matter:
3. The prior art of record (Asay et al US Pat. No. 5,903,882) teaches a computer system and method for managing reliance in an electronic transaction system that includes a certification authority issuing a primary certificate to a subscriber and forwarding, to a reliance server, information about the issued primary certificate. The subscriber forms a transaction and then provides the transaction to a relying party. The transaction includes the primary certificate or a reference thereto. The relying party sends to the reliance server a request for assurance based on the transaction received from the subscriber. The reliance server determines whether to provide the requested assurance based on the information about the issued primary certificate and on the requested assurance. Based on this determination, the reliance server issues to the relying party a secondary certificate providing the assurance to the relying party.

Even though, the prior art of record teaches a method and a corresponding system for performing the above mentioned steps, the prior art of record fails to teach a method and corresponding system for managing reliance in an electronic transaction

system comprising a reliance server obtaining electronic signals representing information regarding the subscriber assurance issued by the issuing authority, the reliance server issuing electronic signals representing a signed warranty offer to a relying party, the signed warranty offer being based at least on the subscriber attribute assurance, wherein the reliance server only provides the signed warranty offer if the relying party is authorized to make a request for said warranty as specified in the detailed description of the specification. For these reasons claims 1 and 12 are deemed to be allowable over the prior art of record, and claims 2-11 and 13-33 are allowed by dependency.

Any comments considered necessary by Applicant must be submitted no later than the payment of the issue fee, and to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled Comments on Statement of Reasons for allowance.
